

# Conservation

Object ID	3,601
Heading	Initial Inspection
Entry	Engine stripped, big end required adjustment. Upper half of big end had worn to the extent the oilways had almost gone, these have been re-cut. Valves were ground and seated. Little end bearing had worn in the rod, location pins were removed and the bearing re-fitted. Cylinder, piston and rings in good condition.
Entry Date	2011-03-26
