Object ID	793
Heading	State On Arrival
Entry	Engine had not run since 1990. Standby use from 1945 until 1990 it was started three times a year and run on a load bank for an hour. Basically in sound condition but the rings on number 3 appear stuck as it is smoking hard through the crankcase. Plan is to get the water system on and run the engine until hot to see if the rings free. Otherwise a strip of number 3 will be required.
