Objectid	1,026,877
Description	NULL
Image	 A large industrial machine, possibly a steam engine or boiler, with a prominent red motor on the right side. The machine is connected to various pipes, valves, and gauges. It is situated in a workshop or industrial setting with a concrete block wall in the background. A control panel with multiple switches and gauges is visible on the left side of the machine. A small table with tools and a blue container is in the foreground.
Thumb	 A small thumbnail image of the industrial machine, showing a close-up of the red motor and the surrounding piping.
