Objectid	12
Description	Engine monitoring cabinet - lightup sensor etc
Image	 A photograph of an engine monitoring cabinet mounted on a wall. The cabinet is a light-colored metal box with a door that is slightly ajar. To the left of the cabinet is a white control panel with a 'START/STOP' button. Above the cabinet is a large, horizontal, insulated pipe. To the right of the cabinet, there are several sensors and components, including two blue cylindrical sensors, a red cylindrical sensor, and a small rectangular control box. Numerous wires are connected to these components and run along the wall. The background is a light-colored brick wall.
Thumb	 A small thumbnail version of the main image, showing the engine monitoring cabinet and its associated components.
