

Objectid	Description	Image	Thumb
1,610	Assembled at the museum		
1,610	Before removal from Gerrards Cross		

Objectid	Description	Image	Thumb
1,610	Being commissioned in Hall 7		
1,610	Exhaust side - covers on, arrival day		

Objectid	Description	Image	Thumb
1,610	Exhaust side during refitting of rocker gear	 A large, blue-painted industrial engine, likely a diesel, is shown from the side. A man with white hair and glasses is standing on top of the engine, working on the valve train (rocker gear). The engine has various pipes, valves, and a large flywheel visible. It is situated outdoors in front of a building with corrugated metal siding.	 A small thumbnail image showing the same engine from a slightly different angle, highlighting the man working on it.
1,610	Refitting the rockers on arrival at the museum	 A large, blue-painted industrial engine is shown from the side. A man in a dark jacket is standing on a platform next to the engine, working on the top. The engine has a large flywheel and a motor. It is situated outdoors in front of a building with a white wall and a wooden fence.	 A small thumbnail image showing the same engine from a slightly different angle, highlighting the man working on it.
