1,622	After stripping off the manifolds	 A man with white hair and glasses, wearing a grey work shirt, is working on a large, green, multi-cylinder engine. The engine has several manifolds removed, and the man is using a tool to work on the remaining parts. The engine is outdoors, and a green van is visible in the background.	
1,622	Before stripping at the museum	 A large, blue, multi-cylinder engine is shown indoors, likely in a museum. The engine has several manifolds still attached, and the man is using a tool to work on the remaining parts. The engine is outdoors, and a green van is visible in the background.

Objectid	Description	Image	Thumb
1,622	Crankcase assembly complete	 A man wearing a green and white high-visibility jacket, a dark beanie, and glasses is standing in a workshop. He is holding a white bucket of red paint and a brush, applying paint to a large, complex metal crankcase assembly that is painted red. The assembly is positioned horizontally on the floor. The workshop background is filled with various tools, equipment, and a yellow machine.	 A small thumbnail image showing the same red crankcase assembly from a different angle, highlighting its length and the various mechanical components.

Objectid	Description	Image	Thumb
1,622	Restoration nearly complete - museum workshop	 A large, red-painted industrial engine, likely a diesel or gas engine, is shown in a workshop setting. The engine is mounted on a base and features various pipes, valves, and a large flywheel on the left side. The background shows other workshop equipment and a concrete floor.	
1,622	Restoration nearly finished - in the museum workshop	 A red industrial engine, similar to the one in the first image, is shown from a different angle. It features a large flywheel on the left side and is mounted on a base. The engine is in a workshop setting with a wooden wall in the background. A blue container and a white bucket are visible in the foreground.
