Objectid	1,751
Description	BBC image
Image	 A large black and white photograph of a steam engine in a museum. The engine is a complex piece of machinery with a large flywheel in the foreground, partially enclosed by a metal railing. The background shows other parts of the engine and the interior of a large building with high ceilings and structural beams. The lighting is dramatic, with strong highlights and deep shadows.
Thumb	 A small thumbnail version of the steam engine photograph, showing the same scene as the main image but at a much smaller scale.
