Objectid	Description	Image	Thumb
2,916	Bore ater initial strip	 A close-up photograph of a yellow-painted metal component, likely a pump or valve. The central feature is a large, dark, cylindrical bore. To the left of the bore, there is a smaller, circular opening with a red, lattice-like cover. The yellow paint is worn and chipped in several areas, revealing the underlying metal. The background is a dark, textured surface.	 A small, square thumbnail image of the same yellow component, showing the bore and the red cover from a slightly different angle.

2,916	Preparing to lift the engine onto the wagon in Wiltshire	 A large green steam engine is being lifted by a yellow crane using heavy chains. A man in a black shirt and dark trousers stands to the left, observing the process. The engine is mounted on a wooden frame. The background shows a brick building and a blue sky with clouds.	 A small thumbnail image showing the same green steam engine being lifted by a crane.
