| 2,957 | On collection from the Motor Boat Museum |  A large, teal-colored vintage outboard motor is shown mounted on a red metal frame. The motor has a prominent silver-colored fuel tank on the right side and a wooden propeller on the left. The entire assembly is set against a dark, textured background, possibly a workshop floor. |  A small thumbnail image of the outboard motor, showing a different angle or a smaller view of the same object. |
