Description	Close up of engine plate
Image	 A close-up photograph of a heavily rusted and weathered metal engine plate. The plate is dark, with significant surface corrosion and some lighter, flaking areas. A circular logo is embossed in the center, containing the text "RUSTON & HORNSBY" at the top, "Ruston-Hornsby" in the middle, and "LONDON - ENGLAND" at the bottom. Below the logo, a small rectangular plate displays the serial number "119446". The engine plate is part of a larger mechanical assembly, with various other metal components and bolts visible in the background. The overall appearance is that of an old, well-used industrial machine.
Thumb	 A small, square thumbnail image showing a portion of the engine plate, specifically the area around the circular logo and the serial number plate.
