Objectid	3
Description	
Image	 A large industrial steam engine is displayed in a museum. The engine is mounted on a white concrete base and features a prominent flywheel with multiple spokes. A horizontal metal bar runs across the front of the engine. In the background, there is a window and a control panel with several gauges. A hanging lantern is visible above the engine. A small globe sits on the floor in front of the engine.
Thumb	 A small thumbnail image of the steam engine, showing the flywheel and the front metal bar.
