Description	Alternator plate
Image	 A detailed photograph of a rectangular metal plate with a rusted, textured surface. The plate is mounted on a larger, similarly rusted metal structure. At the top, a horizontal strip contains the text 'PATENT APPLIED FOR'. Below this is a large, octagonal-shaped label with embossed text. The label reads: 'STAMFORD' in large letters, followed by 'ALTERNATOR TO B.S.S. 168'. Below this are several rows of specifications: 'TYPE A 215 No 4146/12', 'K.V.A. 33.8 R.P.M. 1500', 'P.F. 0.8 RATING CONT', 'VOLTS 240 PHASE 1 ~ 50', 'AMPS 140', 'EX.VOLTS EX.AMPS', and 'FACTOR FOR 50°C RISE'. At the bottom of the label, it says 'ARTHUR LYON & CO. (ENGINEERS) LTD. LINCOLNSHIRE, ENGLAND.'.
Thumb	 A small, square thumbnail version of the main image, showing the same rusted metal plate with the technical specifications label.
