Objectid	3,607
Description	Side view after restoration
Image	A side view of a restored mechanical device, possibly a pump or engine component. The device is made of grey cast iron and features a large, circular gear with many teeth. A vertical shaft passes through the center of the gear. The device is mounted on a base and is connected to a vertical pipe. The background shows a white wall and a window with green shutters. A green horizontal bar is visible in the foreground.
