Objectid	3,686
Description	Rebuild
Image	 A large, industrial Allen engine, likely a diesel or gas engine, is shown in a workshop setting. The engine is mounted on a heavy metal base and features two large, rectangular metal plates on the front, both embossed with the word "ALLEN". To the right of the engine is a large, dark, multi-ribbed flywheel. Further to the right is a generator or alternator unit, which is light blue and has a red, circular component visible. The engine is connected to the generator by a belt drive system. The background is a plain, light-colored wall, and the floor is a reddish-brown color.
Thumb	 A small thumbnail image of the Allen engine, showing the front view with the "ALLEN" branding on the metal plates.
