Objectid	4
Description	Major work finished, October 2006
Image	 A large, dark-colored industrial steam engine is the central focus, mounted on a white base. It features a tall vertical cylinder, a complex valve gear mechanism, and a large flywheel. A wooden ladder is attached to the side for access. The engine is situated in a room with a corrugated metal roof and walls. In the foreground, a green metal railing with a wooden bench sits on a red floor. To the right, a collection of tools, including wrenches and sockets, are hanging on a rack. Other smaller mechanical components and a large cylindrical tank are also visible in the background.
Thumb	 A small, square thumbnail image showing a different angle or a smaller section of the steam engine exhibit, maintaining the same green railing and red floor context.
