Objectid	4
Description	Lifting the timing end head, 2005
Image	 A large yellow crane is lifting a heavy, dark-colored component (the timing end head) from a large industrial machine in a factory. The crane's arm is extended, and the component is suspended by a hook. The machine is complex, with various pipes, valves, and a ladder. The factory has a corrugated metal roof and a concrete floor. A green safety railing is visible in the foreground.
Thumb	 A small thumbnail image showing the same scene as the main image, but from a slightly different angle, focusing on the crane and the component being lifted.
