Objectid	4
Description	In-situ, Kew 4
Image	 A large, dark blue industrial steam engine is shown in a museum setting. The engine features a prominent horizontal boiler at the top, supported by a metal frame. Below the boiler is a large, dark blue cylindrical component, likely the cylinder or condenser. A large, light-colored flywheel with a dark rim is visible on the right side, connected to a central shaft. The engine is mounted on a concrete base. The background shows a museum interior with other exhibits and a white wall.
