Objectid	4
Description	In-situ, Kew 6
Image	 A large, dark blue industrial steam engine, likely a Worthington model, is shown in a museum or workshop setting. The engine features a prominent flywheel on the left side, a large horizontal pipe extending from the left, and a tall, cylindrical boiler section. A wooden ladder is leaning against the right side of the engine. The base of the engine has the name 'WORTHINGTON' visible. The background shows a white ceiling with exposed beams and a fluorescent light fixture.
