Objectid	4
Description	In-situ, Kew 4
Image	 A photograph of a large, dark-colored industrial steam engine, likely a portable engine, in a museum setting. The engine features a large horizontal cylinder at the top, a complex arrangement of pipes and valves, and a large flywheel on the right side. The flywheel has a light-colored rim with many small holes. The engine is mounted on a base, and the background shows a white wall and some structural elements of the building.
