Objectid	709
Description	After restoration in 2005
Image	 A large, restored mechanical engine, possibly a tractor or generator, is shown in a dark setting. The engine is painted a vibrant green, with its frame and support structure painted a bright orange. The engine features a large flywheel on the left side, a fuel tank on top, and various pipes and hoses. A white fuel filter is visible on the left side of the engine. The engine is mounted on a black base. The background is dark, with some light reflecting off the engine's surfaces.
Thumb	 A small thumbnail image of the green and orange engine, showing a similar view to the main image but at a smaller scale.
