Objectid	992,546
Description	On arrival
Image	 A large, black industrial engine, likely a diesel, is shown from a front-three-quarter view. It features five prominent red circular valve covers on top. A bright yellow cylindrical component, possibly a fuel filter or air filter, is mounted on the left side. The engine is mounted on a blue metal frame. In the background, there's a red structure and a building with a window. The scene is outdoors on a paved surface.
Thumb	 A small, square thumbnail image of the engine, showing the same components as the main image but at a much smaller scale.
